

Dear Charles Milstein,

As an individual that works with people with disabilities, I am aware how transportation is a major barrier for them. Yes there is ParaTransit but you can not go anywhere spontaneously, they often pick you up early or late. If the cities cabs were accessible it might decrease the strain on the already strained ParaTransit system and increase the freedom of those with disabilities. I want you to know I am supporting an increase in accessible cabs.

Thank you for your consideration,
Colleen Taraborrelli
